# **CHAPTER 1**

## **INTRODUCTION**

## Background of the organization

Lanka Bangla is a leading trading company in Bangladesh with a focus on providing an array of financial services to its diverse clientele. Established with the goal of being a cornerstone in the financial sector, Lanka Bangla has carved out a reputation for reliability, transparency, and regulatory compliance. It operates under stringent guidelines and oversight, ensuring the highest levels of customer satisfaction.

## Background of the project

As part of our continuous effort to enhance customer experience and adapt to technological advancements, we have undertaken the project of building Lanka Bangla's new website. While the previous platform served its purpose, it became necessary to develop a new, more functional, and secure website that could cater to the sophisticated needs of our modern customer base.

## Objective of the project

The primary objectives of this website redevelopment initiative are as follows:

1. To create a secure, user-friendly, and efficient platform for financial trading and account management.
2. To streamline the multi-stage account creation process, from general customer accounts to specialized BO accounts.
3. To integrate seamless verification processes carried out by our Relationship Managers and Head of Settlement.

## Scope of the project

The project encompasses several critical aspects:

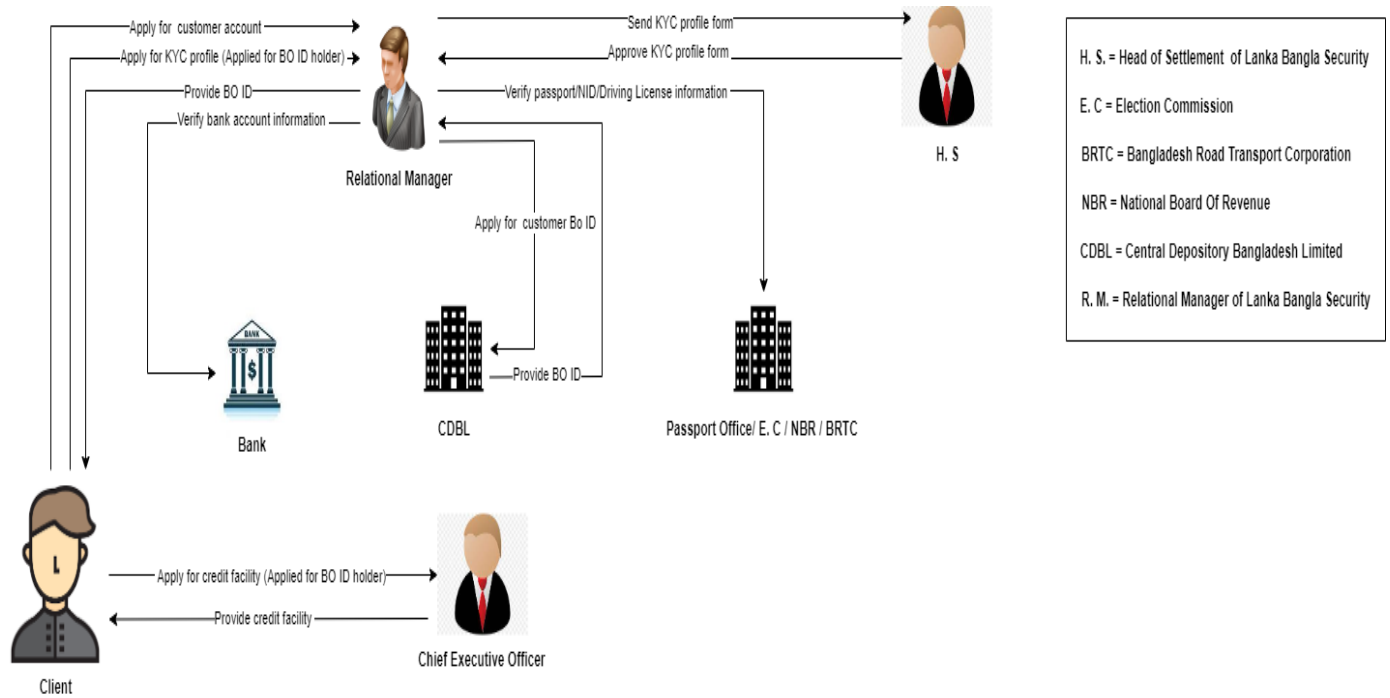

1. **Two-Stage Account Creation:** Implement a two-step procedure where customers initially fill out a basic customer account form, followed by the completion of a BO account form.
2. **BO ID Generation:** Incorporate an automated feature for allocating BO IDs via CDBL (Central Depository Bangladesh Limited).
3. **KYC and Value-Added Services:** Introduce a system that allows customers to easily submit their KYC information and opt for value-added services securely online.
4. **Power of Attorney and Multiple Nominees:** Create a dedicated section for users to add or modify Power of Attorney details and appoint multiple nominees.
5. **Role of Relationship Managers and Head of Settlement:** Integrate a backend functionality that enables Relationship Managers and the Head of Settlement to verify and approve customer information, thus finalizing the account creation process.
6. **Security and Compliance:** Employ industry-standard encryption techniques and security measures to protect customer data and ensure regulatory compliance.
7. **Customer Support:** Provide comprehensive guidelines and support channels to assist both new and existing users.

By focusing on these areas, Lanka Bangla aims to offer an unprecedented level of convenience and security to its customers, thereby solidifying its position as a leading financial institution in Bangladesh.

**RICH PICTURE (TO-BE)**

## SIX ELEMENT ANALYSIS(TO-BE)

Process	Human	Non-computing Hardware	Computing Hardware	Software	Database	Network and Communication

Registration Into System	<b>Customer,</b>  <b>Relational Manager,</b>  <b>Head Of Settlement,</b> a) Every user registrar into the system.	N/A	<b>Networking Devices</b>  a) Router, switch, and other devices use for getting internet to connect with the server.  <b>Computer/ Laptop</b>  a) Users will use computer/laptop to get access into the system. b) Through computer user will view the data.	<b>Excel</b>  a) Use to collect user's information .  <b>Browser</b> a) Any browser can be used to Access the system.	<b>System Database</b>  a) Source of all the data stored in the database.  <b>Excel files</b>  a) Source of user's information	<b>Internet</b>  a) Need internet to access the data stored
Login Into System	<b>Customer,</b>	N/A	<b>Computer/ Smartphone:</b> a) Used for accessing & adding/editing	<b>Browser</b> a) Chrome, firefox etc,	<b>System Database</b>	<b>Internet:</b> Used to communicate with LankaBangla

	<b>Relational Manager,</b>  <b>Head Of Settlement,</b>		data.	<b>LankaBangla system</b>	a) Source of all the data stored in the database.  <b>Excel files</b>  a) Source of user's information	system to log in.
Apply for user account	<b>Customer</b> a) Customer fillup customer account form b) Apply for credit facility c) Fillup KYC form	N/A	<b>Computer/ Smartphone:</b> a) Used for accessing & adding/editing data	<b>Browser</b> a) Chrome, firefox etc, <b>LankaBangla system</b>	N/A	

Verify customer Information	<b>Relational Manager</b> a) Verify customer's information from E.C., NBR, BRTC	N/A	<b>Computer/ Smartphone:</b> a) Used for Accessing, verifying & adding/editing data	<b>Browser a)</b> Chrome, firefox etc, <b>LankaBangla system</b>	<b>System Database</b> a) Source of all the data stored in the database.	
Application approval	<b>Relational Manager</b> a) Approve the form and send it to CDBL.  <b>Head Of Settlement</b> a) Approve customer KYC profile.	N/A	<b>Computer/ Laptop/Mobile</b> devices use for getting approval messages by sms/email.	<b>Browser a)</b> Chrome, firefox etc, <b>LankaBangla system</b>	<b>System Database</b> a) Source of all the data stored in the database.	<b>Internet</b> a) Need internet to get an email.

Notify Custom er through Notificati on	<b>Relation al manager</b>	N/A	<b>Computer/ Laptop/Mobile notification</b>	<b>Browser a) Goggole Crome, mozilla fire box ect.</b>	N/A	<b>Internet</b>  a) Need internet to notification

## CHAPTER 3

# LOGICAL SYSTEM DESIGN

## BUSINESS RULE

A client has a client code, title, name, email, phone no, present address, permanent address, gender, date of birth(dob), occupation, bank code, branch code, routing no, bank account no, photo, client signature, branch, eTin, opening date, father name, mother name, spouse name. Bank info holds bank code, branch code, routing no, bank account no, and client name holds title and name. A client can be a single account holder or joint account holder or company account holder at the same time. The client is uniquely identified from the client code.

A joint client account has a client code, joint title, name, email, phone no, present address, permanent address, gender, date of birth(dob), occupation, photo, client signature, branch, eTin, opening date, father name, mother name, spouse name. The joint client is uniquely identified from the client code.

A company account has a client code, joint title, name, email, phone no, present address, permanent address, gender, date of birth(dob), occupation, photo, client signature, branch, eTin, opening date, father name, mother name, spouse name. The company account is uniquely identified from the client code.

A client may apply for a BO account. BO account has an application id, introducer id, contact details, and passport. Contact details hold city, postcode, state, country, issue date, and expiration date. Passport holds passport no, issue place, issue date, expiry date. A BO account must have one client account. The BO account is uniquely identified from the application id.

Nominee have nom application id, title, name, address, phone, mobile, city, state, postcode, country code, country code, gender, dob, photo, signature, nationality, relationship, passport no, issue date, issue place, expiry date, NID, email, percentage. Nominee name holds the title and name. Passport info holds passport no, issue date, issue place, expiry date. The Nominee is uniquely identified from the nom application id. A nominee must have one or more BO accounts. A BO account may have one more nominee.

Power of attorney has id, title, name, address, city, postcode, state, country, telephone, mobile, fax, email, passport no, issue date, issue place, expiry date, nationality, dob, photo signature. Power of attorney name hold title and name. Contact holds address, city, postcode, state, country, telephone, mobile, fax, email. Passport holds passport no, issue date, issue place, expiry date. Power of attorney uniquely identify from id. Power of attorney depends on BO account. A power of attorney must have one BO account. A BO account may have a power of attorney.

EFT has id and multiple product type. EFT uniquely identifies from id. A BO account may apply an EFT and an EFT must have a BO account.

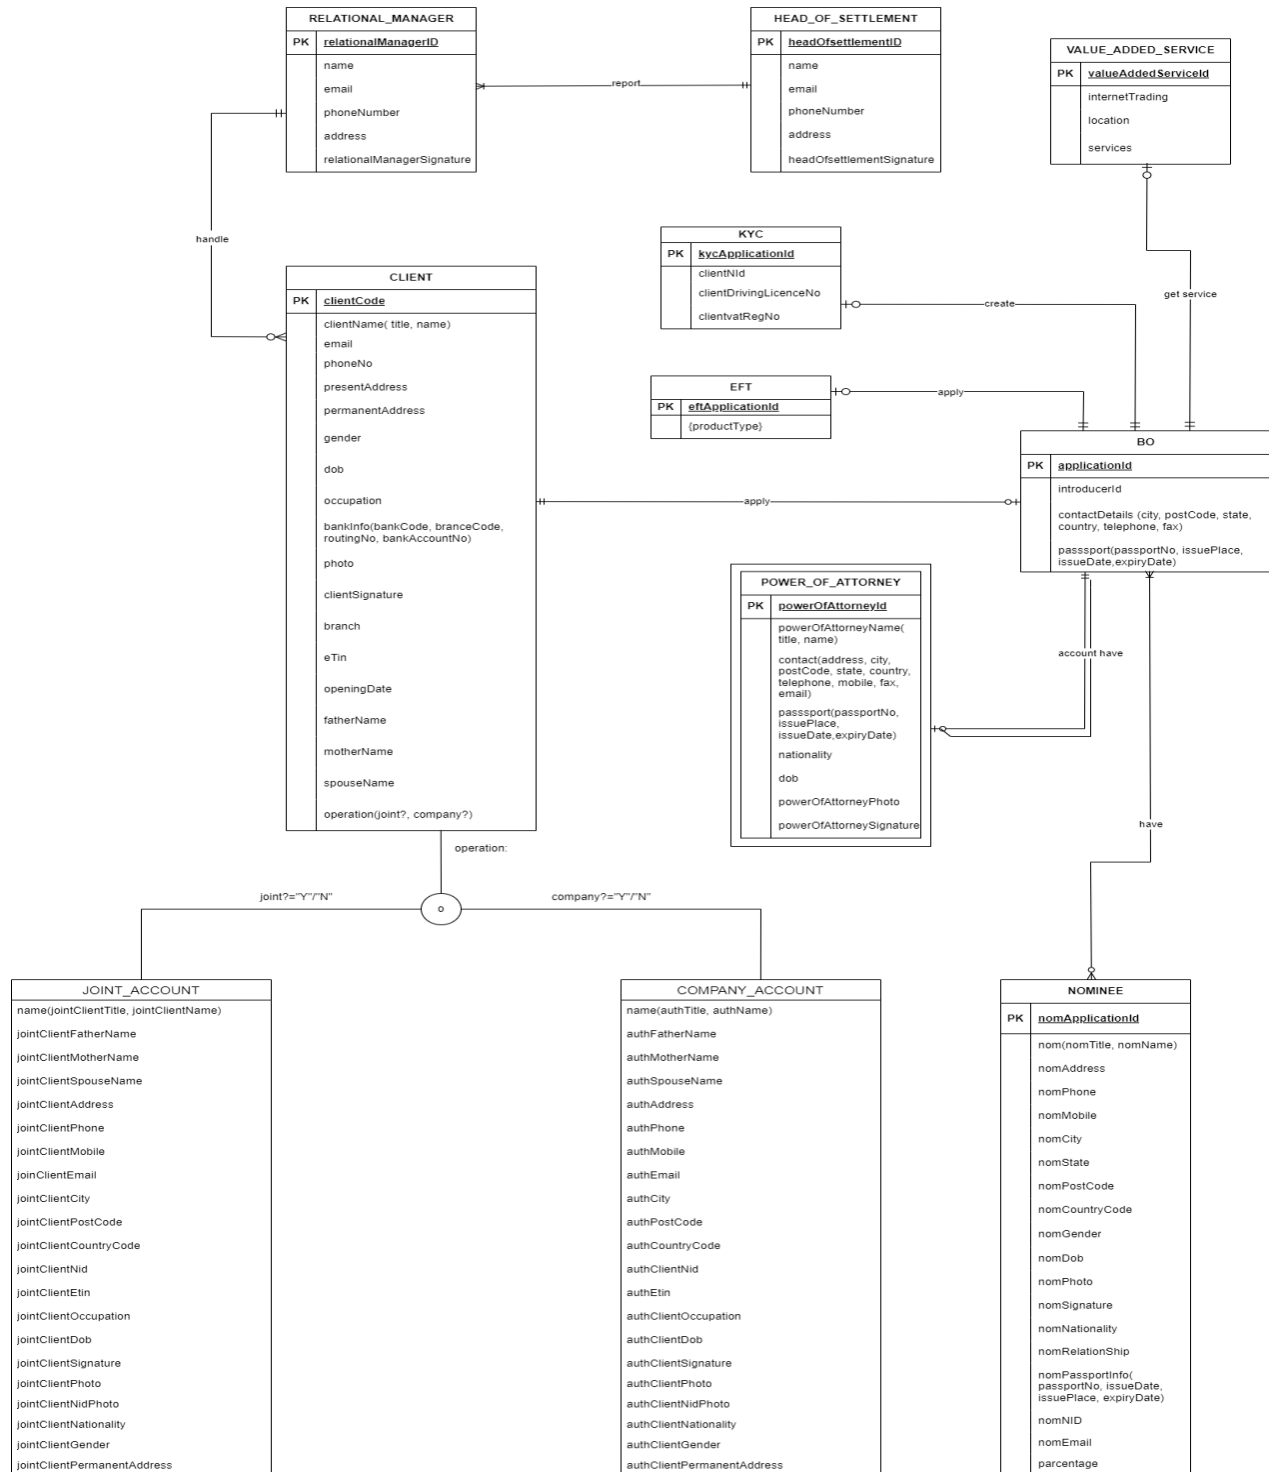

KYC has id, client NID, client driving license no, client reg no. KYC is uniquely identified from id. A KYC form must create a BO account holder. A BO account may create a KYC from.

Value added service has id, internet trading, location and services. A BO account holder may get a service and to get value added service must have a BO account holder.

Relational manger has an id, name, email, phone, number, address, signature. Relational manager uniquely identifies from id. A relational manager may handle many client accounts and a client must handled by a relational manager.

Head of settlement has an id, name, email, phone number address signature. Head of settlement uniquely identifies from id. A head of settlement must report one or many relational managers. A relational manager must report a head of settlement.

## DATA DICTIONARY

### CLIENT\_T

Name	Data Type	Size	Remark
clientCode	INTEGER	16	Primary key of the client Example: 1234567
title	VARCHAR	3	Title of the client name. Example: mr./ms.
name	VARCHAR	50	Name of the client Example: Mahidi Hasan, Emon Mahmud
email	VARCHAR	30	Email of the client Example: mahidi001@gamil.com
phoneNo	INTEGER	11	Phone number of the client Example: 01711234567
presentAddress	TEXT	70	Present address of the client. Example: Bashundara, Dhaka
permanentAddress	TEXT	70	Permanent address of the client. Example: Tangail, Dhaka
gender	VARCHAR	15	Gender of the client. Example: male/female
dob	DATE		Date of birth of client. Example: 1999-01-01
occupation	VARCHAR	20	Occupation of the client. Example: Student, job holder, businessmen

bankCode	INTEGER	8	Bank code of the client. Example: 15171819
branchCode	INTEGER	5	Branch code of the bank. Example: 12345
routingNo	INTEGER	8	Client routing no of the bank. Example: 12345678
bankAccountNo	INTEGER	15	Bank account no of the client. Example: 123456789012345
photo	BLOB		Photo of the client. Example: Photo.jpg, photo.pnj
clientSignature	BLOB		Signature of the client. Example: sig.jpg, sig.pnj
branch	VARCHAR	15	Client Branch name. Example: Agargao, Bashundhara
eTin	VARCHAR	15	Client Tin number. Example: 2001264772
openingDate	DATE		Account opening date Example:12/12/2012
fatherName	VARCHAR	30	Father name of the client. Example: MD. Aziz
motherName	VARCHAR	30	Mother name of the client. Example: Ms. Aysha
spouseName	VARCHAR	30	Wife/husband name of the client. Example: Ms. Rokeya, Md. Emon

relationalManagerID	INTEGER	7	Forging of the client table. This is the primary key of the relational manager table. Example: 1234567
---------------------	---------	---	---

**JOINT\_ACCOUNT\_T**

Name	Data Type	Size	Remark
jointClientCode	INTEGER	16	Primary key of the joint account table.
jointClientTitle	VARCHAR	3	Title of the joint client name. Example: Mr./Ms.
jointClientName	VARCHAR	30	Name of the joint client. Example: Mahidi Hasan, Emon Mahmud
jointClientFatherName	VARCHAR	30	Father name of the joint client. Example: MD. Aziz
jointClientMotherName	VARCHAR	30	Mother name of the joint client. Example: Ms. Aysha
jointClientSpouseName	VARCHAR	30	Wife/husband name of the joint client. Example: Ms. Rokeya, Md. Emon
jointClientAddress	TEXT	70	Address of the joint client. Example: Bashundara, Dhaka
jointClientPhone	INTEGER	15	Phone number of the joint client Example: 91711234567789
jointClientMobile	INTEGER	11	Phone number of the joint client. Example: 01711234567
jointClientEmail	VARCHAR	30	Email of the joint client.

			Example: mahidi001@gamil.com
jointClientCity	VARCHAR	10	City of the joint client. Example: Gazipur
jointClientPostCode	INTEGER	4	Post code of the joint client. Example: 3457
jointClientCountryCode	INTEGER	3	Country code of the joint client. Example: 088
joinClientNid	VARCHAR	15	NID of the joint client. Example: 14578920975345
jointClientEtin	VARCHAR	15	Tin number of joint client Example:22334455
jointClientOccupation	VARCHAR	15	Occupation of the joint client. Example: Student, job holder, businessmen
jointClientDob	DATE		Date of birth of joint client. Example: 1999-01-01
jointClientSignature	BLOB		Signature of the joint client. Example: sig.jpg, sig.pnj
jointClientPhoto	BLOB		Photo of the joint client. Photo.jpg, photo.pnj
jointClientNidPhoto	BLOB		Photo of the joint client. Photo.jpg, photo.pnj
jointClientNationality	VARCHAR	15	Nationality of the joint client. Example: Bangladeshi, Indian
jointClientGender	VARCHAR	10	Gender of the joint client.

			Example: male, female
jointClientPermanentAddress	TEXT	70	Permanent address of the joint client. Example: Tangail,Dhaka

**COMPANY\_ACCOUNT\_T**

Name	Data Type	Size	Remark

<b>authMobile</b>	INTEGER	11	Phone number of the authorized client. Example: 01711234567
<b>authEmail</b>	VARCHAR	30	Phone number of the authorized client. Example: mahidi001@gamil.com
<b>authCity</b>	VARCHAR	20	City of the authorized client. Example: Gazipur
<b>authPostCode</b>	INTEGER	4	Post code of the authorized client. Example: 3457
<b>authCountryCode</b>	INTEGER	3	Country code of the authorized client. Example: 088
<b>authClientNid</b>	VARCHAR	15	NID of the authorized client. Example: 14578920975345
<b>authEtin</b>	VARCHAR	15	Tin number of authorized client Example:22334455

<b>authClientOccupation</b>	VARCHAR	20	Occupation of the authorized client. Example: Student, job holder, businessmen
<b>authClientDob</b>	DATE		Date of birth of authorized client. Example: 1999-01-01
<b>authClientSignature</b>	BLOB		Signature of the authorized client. Example: sig.jpg, sig.pnj
<b>authClientPhoto</b>	BLOB		Photo of the authorized client. Photo.jpg, photo.pnj
<b>authClientNidPhoto</b>	BLOB		Photo of the authorized client. Photo.jpg, photo.pnj
<b>authClientNationality</b>	VARCHAR	15	Nationality of the authorized client. Example: Bangladeshi, Indian
<b>authClientGender</b>	VARCHAR	10	Gender of the authorized client. Example: male\female
<b>authClientPermanentAddresses</b>	TEXT	70	Permanent address of the authorized client. Example: Tangail,Dhaka

--	--	--	--

**BO\_T**

Name	Data Type	Size	Remark
applicationId	INTEGER	7	Primary key of BO table. Example: 1234567
clientCode	INTEGER	16	Forging key of the BO table, it's primary key of the client table. Example: 1234567890123456
title	VARCHAR	3	Title of the BO account holder. Example: Mr. / Ms.
city	VARCHAR	20	City of the BO account holder. Example: Dhaka
postCode	INTEGER	4	Post code of the BO account holder. Example: 1234
state	VARCHAR	20	State of the BO account holder. Example: Dhaka
country	VARCHAR	30	Country of the BO account holder. Example: Bangladesh, India

telephone	INTEGER	15	Telephone of the BO account holder. Example: 987654321234567
fax	INTEGER	15	Fax of the BO account holder. Example: 987654321234567
passportNo	INTEGER	15	Passport no of the BO account holder. Example: 098765432123
issuePlace	VARCHAR	20	Issue place of the passport.
issueDate	DATE		Issue date of the passport. Example:2022-02-09
expiryDate	DATE		Expiry date of the passport. Example:2025-02-09
introducerId	INTEGER	16	Introducer id of the BO account holder. Example: 0976543323456789090

**NOMINEE\_T**

Name	Data Type	Size	Remark
applicationId	INTEGER	7	PK of BO table ,FK of nominee table
nomApplicationId	INTEGER	3	pk
nomTitle	VARCHAR	3	Title of the nominee Example:Mr/MS

nomName	VARCHAR	30	Nominee name Example:Mahidy hasan
nomAddress	TEXT	70	Nominee address Example:Bashundhara,dhaka
nomPhone	INTEGER	15	Nominee Phone no. Example:55371
nomMobile	INTEGER	11	Nominee Mobile no. Example:01767996651
nomCity	VARCHAR	20	Nominee city Exapmle:Dhaka,Tangail
nomState	VARCHAR	20	Nominee State Example:Dhaka
nomPostCode	INTEGER	4	Nominee postal code Example:1212
nomCountryCode	INTEGER	3	Nominee Country Code Example:088
nomGender	VARCHAR	10	Nominee gender Example:Male/female
nomDob	DATE		Nominee date of birth Example:12.12.12
nomPhoto	BLOB		Nominee Photo Example:photo.png
nomSignature	BLOB		Nominee signature

			Example:sig.png
nomNationality	VARCHAR	15	Nominee nationality Example:Bangladeshi/Indian
nomRelationShip	VARCHAR	20	Nonminee relationship Example:Father/mother/daughter
passportNo	INTEGER	15	Nominee passport no. Example:12233344444
issueDate	DATE		Issue date Example:12/12/13
issuePlace	VARCHAR	20	Issue place
expiryDate	DATE		Expiry Date Example:12/12/29
nomNID	VARCHAR	15	Nominee NID Example:12131456778899
nomEmail	VARCHAR	30	Nominee Email Example:mithun@gmail.com
percentage	DECIMAL	(3,0)	Nominee percentage 10%/20%

**POWER\_OF\_ATTORNEY\_T**

Name	Data Type	Size	Remark
------	-----------	------	--------

applicationId	INTEGER	7	Foreign key of the power of attorney table, and primary key of the BO table. Example: 1234567
powerOfAttorneyId	INTEGER	7	Primary key of the power of attorney table Example: 7654321
title	VARCHAR	3	Title of the power of attorney. Example: Ms. / Mr.
name	VARCHAR	30	Name of the power of attorney. Example: Bisawjit Das
address	TEXT	70	Adress of the power of attorney. Example: Bhuapur, Tangail
city	VARCHAR	30	City of the power of attorney. Example: Tangail
postCode	NUMBER	4	Post of the power of attorney. Example: 4321
state	VARCHAR	15	State of the power of attorney. Example: Dhaka
country	VARCHAR	20	Country of the power of attorney. Example: Bangladesh

telephone	INTEGER	15	Telephone number of the power of attorney. Example: 098765432123456
mobile	INTEGER	11	Mobile of the power of attorney. Example: 01712345678
fax	INTEGER	15	Fax number of the power of attorney. Example: 890765432123456
email	VARCHAR	30	Email of the power of attorney. Example: mithun@gamil.com
passportNo	INTEGER	15	Passport number of the power of attorney. Example: 890789654321234
issuePlace	VARCHAR	15	Issue place of passport. Example: Uttara, dhaka.
issueDate	DATE		Issue date of passport. Example: 2022-10-10
expiryDate	DATE		Expiry date of passport. Example: 2027-10-10
nationality	VARCHAR	15	Nationality of the power of attorney. Example: Bangladeshi, Indian.

dob	DATE		Date of birth of the power of attorney. Example: 1999-07-09
powerOfAttorneyPhoto	BLOB		Photo of the power of attorney. Example: ph.jpg
powerOfAttorneySignature	BLOB		Signature of the power of attorney. Example: jo.png

**RELATIONAL\_MANAGER\_T**

Name	Data Type	Size	Remark
relationalManagerID	INTEGER	7	pk
name	VARCHAR	30	Name of relational manager Example:Mithun,emon
email	VARCHAR	30	Relational manager email Example:towhid@gmail.com

## OUTPUT

The screenshot shows the 'Value Added Service Form' in a web browser. The browser's address bar shows the URL 'localhost/LankaBanglaSecurities/Client/ValueAddedService.html'. The navigation bar includes links for Home, Account Opening Form, BO Form, Credit Facility Form, EFT Form, KYC Profile Form, Value Added Service Form, and Logout. The form itself has a title 'VALUE ADDED SERVICE FORM' and a section for 'Internet Trading :'. Below this, there are radio buttons for 'Location' (DSE, CSE) and 'Services' (Email Service, SMS Service). A 'Terms & Condition' section follows, containing seven numbered points. The browser's taskbar at the bottom shows the system time as 3:05 AM on 9/5/2023.

Value Added Service Form

Internet Trading :

Location

☐ DSE ☐ CSE

Services

☐ Email Service ☐ SMS Service

Terms & Condition

1. User must maintain the credentials i.e. Login ID and Password for the value-added services strictly and LBSL will not take any responsibility in case of any hacking or disclosure.
2. Order place online for internet trading can not be replaced over phone or email or verbally or SMS or any other mode of communication.
3. The user must maintain the internet transactional compliance issues. LBSL will not be liable for any unauthorized and Non-compliance transaction made by user.
4. User can't have internet trading account for both the exchanges.
5. For SMS services user must be subscriber of GP or Robi
6. SMS push pull services changes are based on operator's conditions.
7. In case of email services, user must confirm that the provided mail must trust in mail not junk.

## Chapter 5

# Conclusion and Recommendation

## CONCLUSION

The redevelopment of Lanka Bangla's new website has been an important step toward modernizing and simplifying the account creation and management process for our clients. By streamlining multi-stage account setups, integrating features like BO ID allocation via CDBL, and roles for Relationship Managers and the Head of Settlement for account verification, we have achieved a robust, secure, and user-friendly platform. This project serves not only to meet but to exceed the evolving needs and expectations of our diverse clientele.

## Recommendation

**User Experience Monitoring:** Upon launch, closely monitor user interactions to identify areas for potential improvement and optimize the overall user experience.

**Staff Training:** Continuously train Relationship Managers and the Head of Settlement to ensure that they are fully versed in the functionalities of the new system.

**Customer Education:** Develop easy-to-follow guides, tutorials, and FAQs to help customers understand how to navigate the new website and perform key tasks such as filling out forms for account creation.

**Regular Security Audits:** Conduct frequent security audits to ensure the robustness of encryption and data protection features, thereby safeguarding customer information.

**Customer Feedback Mechanism:** Implement a straightforward process for collecting customer feedback regarding their experience using the new website. This will provide valuable insights for future updates.

**Legal Compliance:** Continuously update the website to adhere to changing laws and regulations in the financial sector, ensuring that all features and processes remain compliant.

**Real-Time Support:** Consider the addition of real-time support features like a chatbot or live customer service to guide users who may have immediate questions or face issues while using the site.

By acting on these recommendations, Lanka Bangla can ensure the continued success and reliability of its new platform, thereby solidifying its reputation as a leader in Bangladesh's financial services industry.
